

# ENGINEERING FOR KIDS

Bowling Green Elementary Fall 2016

Science Technology Engineering Math

November 2, 9, 16, 30 Wednesdays (4:00-5:00)

## Grades 1&2

### Jr. Aerospace Engineering

Our young engineers will use the Engineering Design Process to design, create, test, and refine a variety of flying machines. Get a firsthand look at the basic mechanics of flight by constructing a whirligig and launching it in our wind tunnel!

\$65

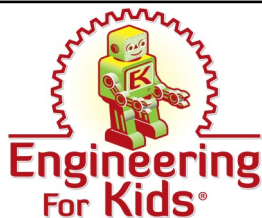

## Grades 3-5

### Mechanical Engineering

In Mechanical Engineering, students learn basics of energy, traction, aerodynamics, and durability while constructing a variety of builds that could include, marble runs, roller coasters that loop, catapults, and a rubber band racer.

\$65
