Mrs. Rose's Search Newsletter

1st Grade Search

The 1st grade Search students have been busy playing detectives around the school. They have been looking at the different patterns that exist around the school and determining what type of pattern it is. This year our focus is on patterns and the different types that exist around us. We will be using several pieces of literature throughout the year.

2nd Grade Search

In 2nd grade Search we are focusing on all of the changes that occur in the world around us. We started with changes to weather and we focused on temperature changes. We then moved into the Water Cycle in which the students made their own example of a water cycle to take home.

Upcoming Events

- October 28th Parent Coffee at Lewis and Clark Elementary at 9:45 am.

Items Needed

Our Search students are in need of recycled items such as paper tubes (paper towel and toilet paper rolls), Plastic bottles (all sizes), egg cartons, shoe boxes, yogurt containers, and other recycled containers. Anything you can donate would be appreciated.

3rd Grade Search

The 3rd grade Search students started reading "Call it Courage". This year our focus is on Relationships. Each week after we read we talk about the different relationships that are going on in story. The students are enjoying reading together and discussing the book. They are also enjoying making predictions on what is to come the next week. After we finish the book we will be doing several different activities to go along with what we have read. Pictures will be posted on my Blog site.

4th Grade Search

The 4th grade Search students have been focused on the different systems that exist in the world today. We are working on the solar system now and we will get into Language and Electrical system throughout the next nine weeks. The students went on a field trip to the Old Port Royal School to compare what school systems were like in the past to today.

5th Grade Search

The 5th Grade Search students have been focusing on Structures. We started our unit with natural structures and the students were asked to research Natural Bridges. The students will be creating a poster or a travel brochure on the bridge of their choice and present it to the class. The students also traveled to The Escape Room in Richmond, VA where they had to solve several clues and puzzles to escape the room that they were in. The students did a great job working together on the task and learned the importance of working as a team.
